MERAH PUTIH

—— *Satellite by Telkom Indonesia*

SATELLITES UNDER PT TELKOM INDONESIA

TELKOM-2

TELKOM-3S

MERAH PUTIH

SATELLITE FACT

Satellite Name: Telkom 4 (Merah Putih)

Status: active

Position: 108° E (108° E)

NORAD: [43587](#)

Cospar number: 2018-064A

Operator: [PT Telekomunikasi Indonesia Tbk](#)

Launch date: 7-Aug-2018

Launch site: [Cape Canaveral](#)

Launch vehicle: [Falcon 9 v1.2](#)

Launch mass (kg): 5800

Dry mass (kg): 2000

Manufacturer: [Maxar Technologies \(SSL/MDA\)](#)

Model (bus): [LS-1300](#)

Orbit: GEO

Expected lifetime: 15+ yrs

Beacon(s): 4199.875, 3701.75

Details:

60 C-Band Transponders to support a broad range of applications and technology advances. 24 standard and 12 extended C-band transponders for domestic use while the remaining 24 transponders will be leased and marketed for India

ABOUT MERAH PUTIH SATELLITE

General

Platform	: SSL-1300
Manufacturer	: Space System Loral (SSL), USA
Design Lifetime	: 15 years

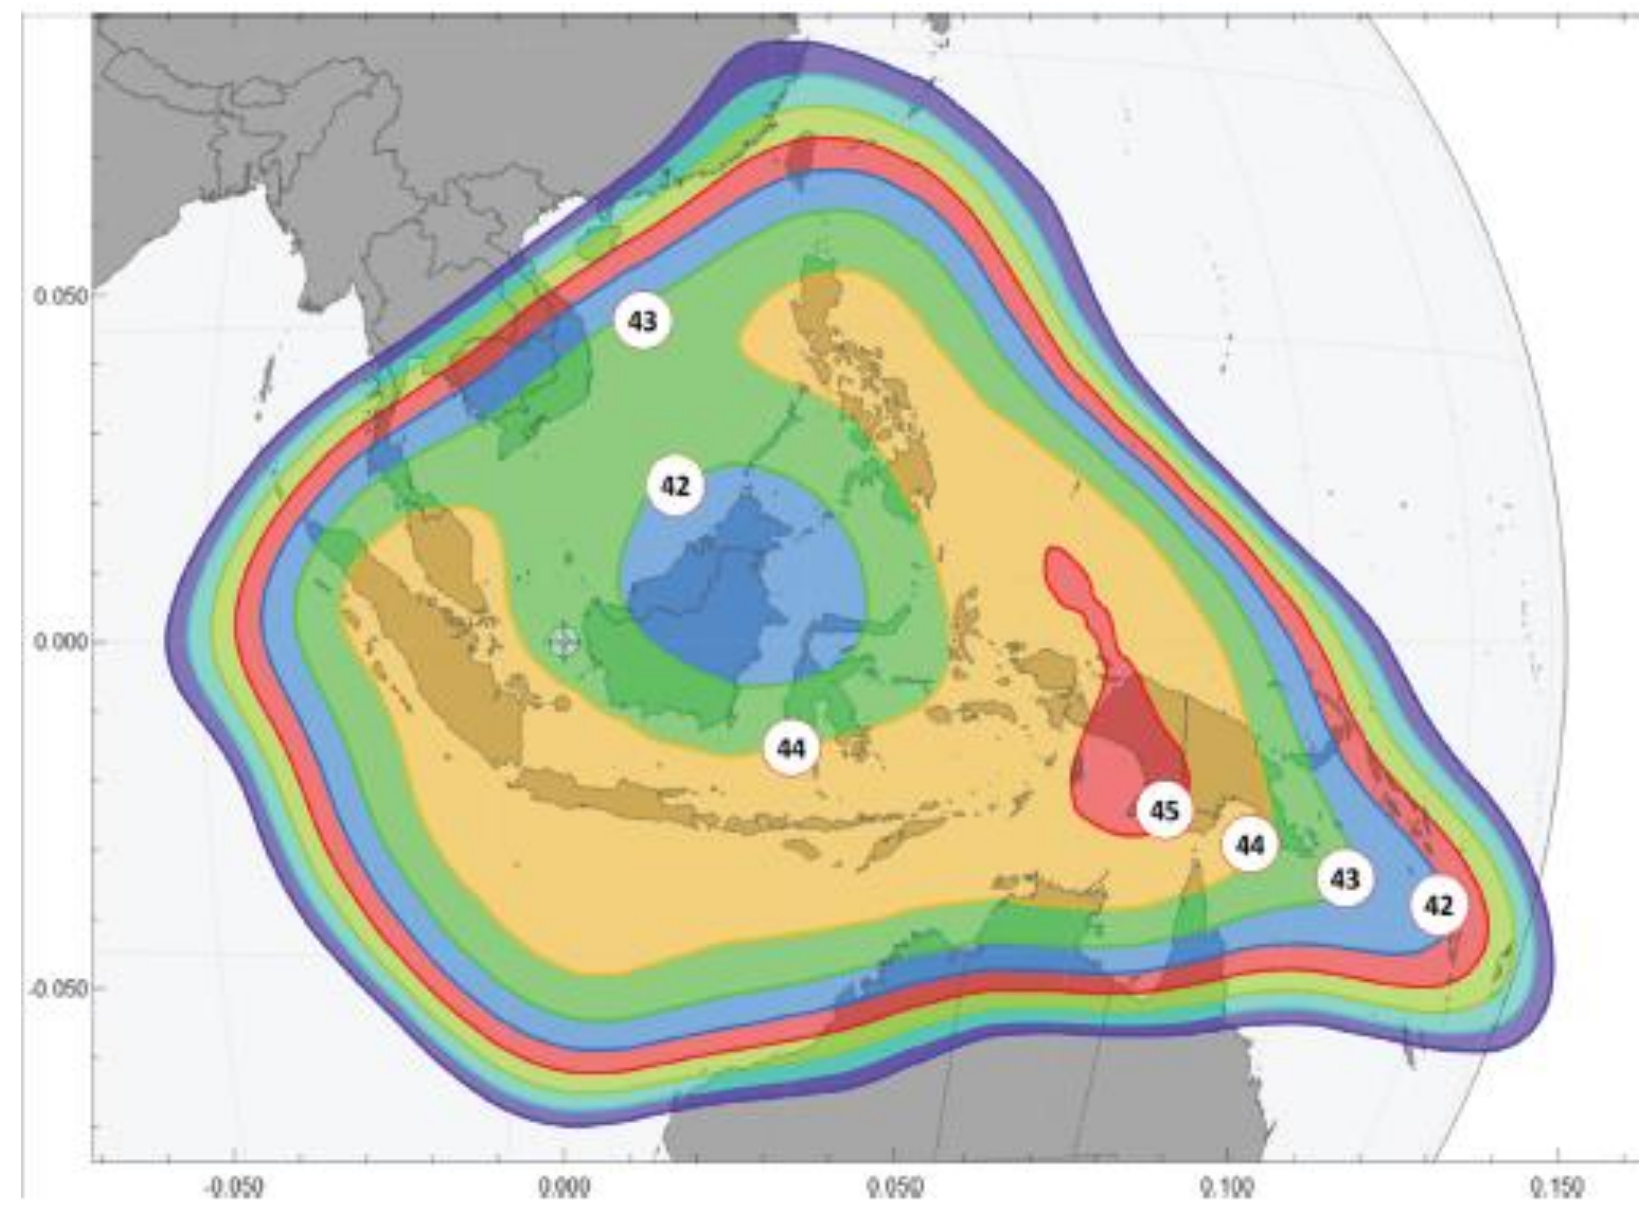

Transponder & Coverage

1. **Standard C-Band** : 24 @36 MHz – South East Asia
2. **Extended C-Band** : 12 @36 MHz – South East Asia
3. **Standard C-Band** : 24 @36 MHz – South Asia

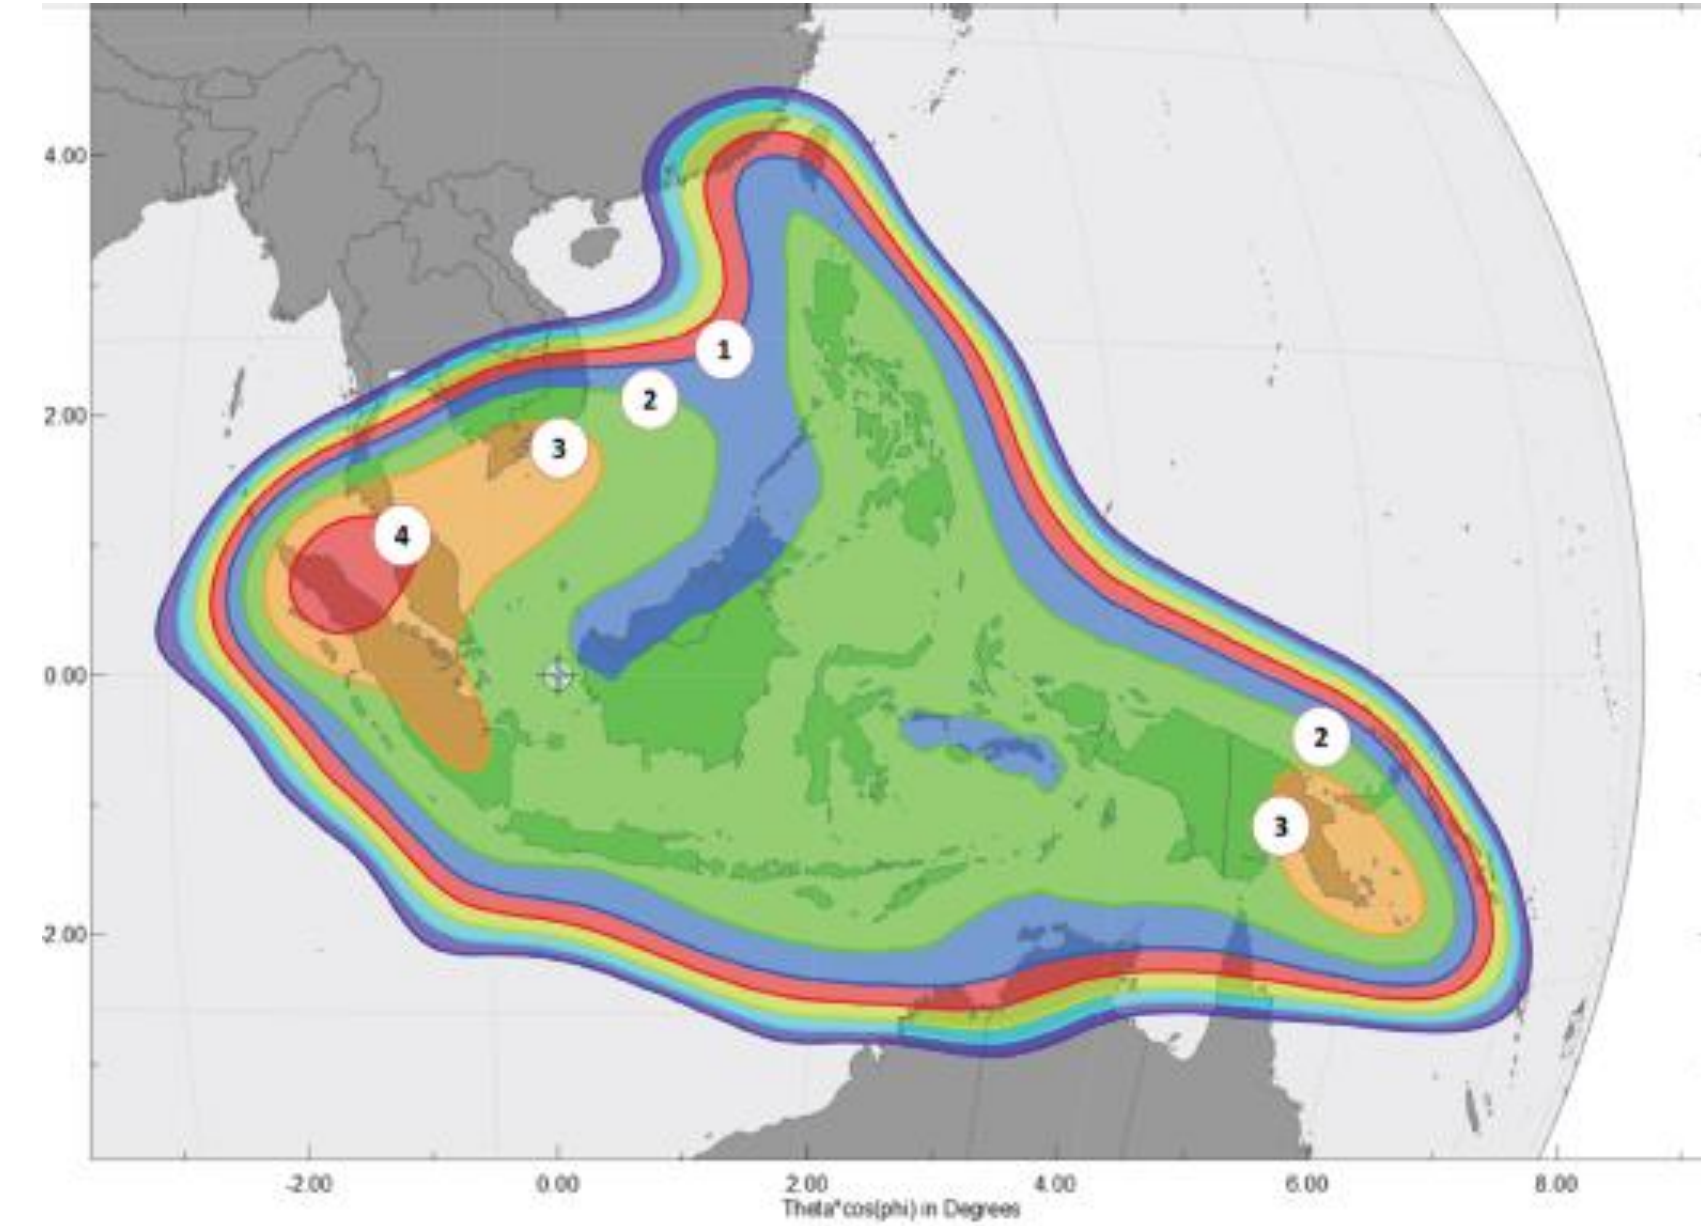

SOUTH EAST ASIA COVERAGE

EIRP C-Band South East Asia Beam

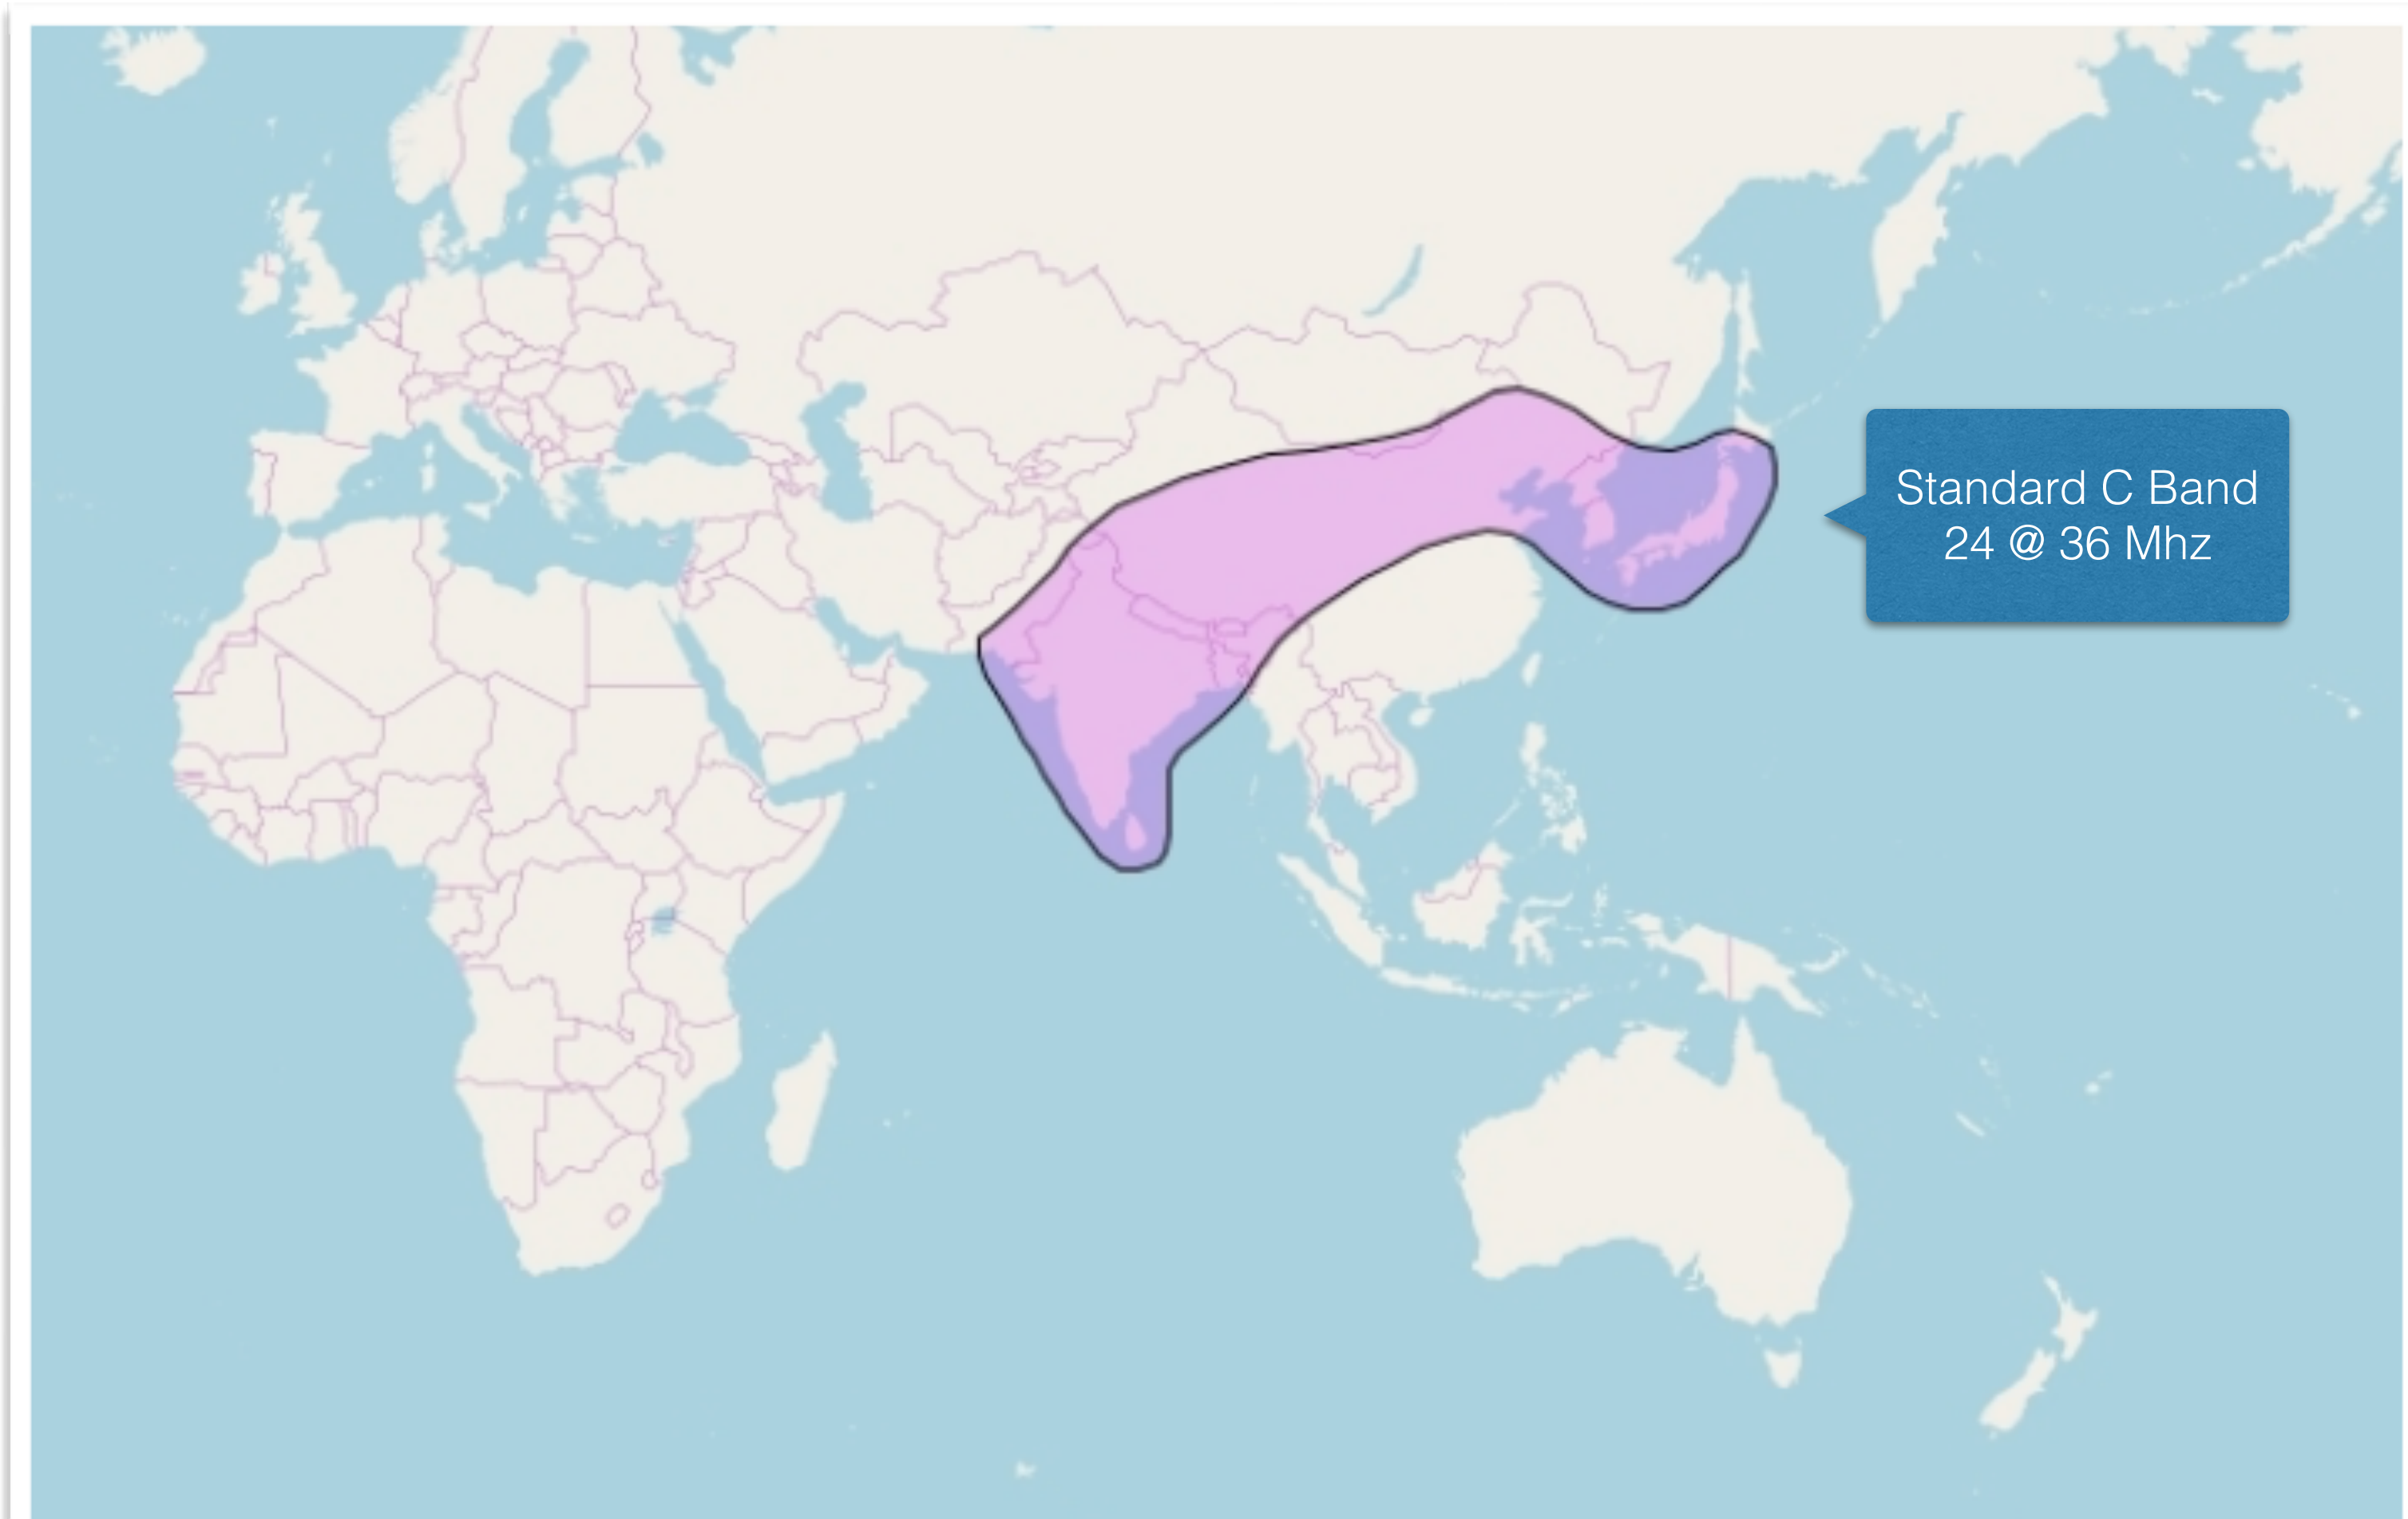

G/T C-Band South East Asia Beam

SOUTH ASIA COVERAGE

BUSINESS OPPORTUNITIES

- 1** As a representative of PT Telkom Indonesia to lease transponders in the South Asia region.
- 2** Business collaboration by creating a hub center for content provider to broadcasts their channels in the South Asia region via MERAH PUTIH satellites
- 3** reciprocal content distribution cooperation between India and Indonesia via the MERAH PUTIH satellite
- 4** and other business cooperation that can be discussed further
